Why Busuu works

Busuu helps learners retain knowledge

Spaced learning

Short bursts of learning with breaks in lessons, allow time for new information to sink in, so learners can engage with new information and remember it.

Chunking

We teach meaningful chunks of around 2 to 5 words at a time to contextualize learning for a clearer understanding of sentence construction.

Micro-learning

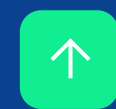

Learners on Busuu focus on one task or concept at a time and can see immediate results. This micro-learning is highly motivational and works especially well in our mobile-driven culture with reduced attention spans.

Our curriculum is designed by our expert team of certified language teachers to make learning really stick. We use proven learning strategies backed up by machine learning, so people progress quickly:

And it works. A 2021 study conducted in association with Dr Roumen Vesselinov and research teams at the University of Maryland, the University of South Carolina and Kharazmi University, found:

Busuu to be 4x more efficient* than classroom learning.

Busuu learners tested moved up a CEFR level in just 20 hours.

An equivalent classroom course can take 4-12 months.
